### Woodinville Traffic Planning

On Thursday night, April 5, 2007, at the Wood Trails Public hearing, the Woodinville traffic specialist addressed the potential traffic problems associated with rezoning the Wood Trails and Montevallo areas. He first displayed a series of charts depicting the data from traffic sampling along the Woodinville-Duvall Road and 156<sup>th</sup> Ave. He pointed out that the data was too sparse, contradictory, and much of it out of date, to allow any accurate analysis of traffic growth on these roads and their intersection. He did not address the reason for not having adequate data to make an analysis. Traffic impact on 156<sup>th</sup> Ave, should be of major importance when considering a zoning change for the area.

In spite of the lack of useful data, he stated that the city's position is that the traffic growth on these roads will be 2.5% based on the Puget Sound Regional Council's (PSRC) analysis of growth in this area. The Regional Council's analysis is based on a study of business and employment projections. However, the PSRC analysis is "growth as usual". It applies to the average increase in traffic across all roads, not to any individual road.

156<sup>th</sup> Avenue is the only access to the city central area and Woodinville Duvall Rd. Traffic on this road apparently increased 16% due to the opening of the COSTCO store. The number of homes in the Wellington area will increase by more than 30% under the two proposed rezoning actions and by more than 50% if all the large landowners, who have indicated a desire to cash in on a rezoning, are successful. An assumption of a 2.5% growth rate seems irrational.

The traffic specialist went on to say that he had no plans for addressing the

existing problems which he acknowledged already exist on 156<sup>th</sup> Avenue and feeder streets, primarily 195<sup>th</sup> St., prior to the Wood Trails development.

It is apparent from this issue as well as a host of others that surfaced in these meetings, that the city Planning Department takes a very narrow view of their responsibility to the city and its citizens. Specifically, they appear to lean toward an attitude of Review and Approve developers plans. They do not look for the costs to the city's infrastructure or the future consequences of developer's activities,

With the current overload of the city road project budget and the shortfall of developer impact fees, they are asking the city to approve a project with very little merit, without in any way quantifying the expected costs to the city. Further, the city Planning Director stated that she would not estimate the potential long term impact of the Wood Trails project on growth in the Wellington area. This appears to be ignoring rather than planning.

The Woodinville Planning Department together with the developer are asking the city to accept undefined and open-ended costs to the city transportation budget. This is not just short-sighted. It is irresponsible and unacceptable. Added to the other significant issues associated with these proposed developments, no rezoning should be approved until the traffic plan and budget are capable of handling the rational expectation of long term growth.

Written Comments

Dear Mr. Smith:

Please accept this letter and enclosure as part of the written record for the hearings on the above-referenced applications.

Enclosed is a copy of the original plat for the property which is the subject of the Montevallo applications. There are two items of significance in the plat. First, the plat depicts a road, labeled N.E. 205<sup>th</sup> Street and N.E. 204<sup>th</sup> Street, over the northern portion of the property and "dedicate[s] to the use of the public forever all streets and avenues shown and the use thereof for all public purposes not inconsistent with the use thereof for public highway purposes." Nothing in the record indicates that this public road dedication was ever vacated. Furthermore, a significant portion of the area depicted as N.E. 205<sup>th</sup> Street has actually been used for many years as a public road to access adjacent properties, including properties to the north that are currently owned by the Husos and the Hanikas. Because the application calls for this public road to be removed and houses built in the public road, and the applicant has not followed the required procedures to vacate the public road, the application should be denied.

The second significant item in the original plat is found under the heading "Restrictions," where the plat states that "no lots shown on this plat shall be divided without prior

Greg Smith

approval from King County and Seattle-King County Department of Public Health.” No such approvals have been obtained by the applicant.

Sincerely,

TOUSLEY BRAIN STEPHENS PLLC

Michael Daudt
